A man in a dark suit and glasses is speaking at a white podium. Behind him are the United Kingdom flag and the United Nations flag. The background features a large graphic of a globe and text including 'United Nations Climate Change' and 'COP26'. In the foreground, the backs of several people's heads and shoulders are visible, along with professional video cameras on tripods, indicating a press conference or public event.

“COP26 kept the 1.5°C goal alive...”

Nations Unies

Conférence sur les Changements Climatiques

COP21/CMP11

(a) Holding the increase in the global average temperature to well below 2°C above pre-industrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels, recognizing that this would significantly reduce the risks and impacts of climate change;

Article 2

OBJECTIVE

The ultimate objective of this Convention and any related legal instruments that the Conference of the Parties may adopt is to achieve, in accordance with the relevant provisions of the Convention, stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system. Such a level should be achieved within a time frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner.

The different

futures that

lie ahead.

+1.5 °C

+2 °C

+3 °C

The image consists of three vertical panels, each representing a different global temperature increase scenario. The background of each panel is an aerial view of the Arctic region, showing sea ice and icebergs. The panels are color-coded: the first is teal, the second is yellow, and the third is purple. Each panel contains text about the probability of an ice-free Arctic summer and the corresponding temperature increase.

3%

probability of an
ice-free Arctic
summer in any
one year..

+1.5°C

16%

probability of an
ice-free Arctic
summer in any
one year.

+2°C

63%

probability of an
ice-free Arctic
summer in any
one year.

+3°C
